

Quick Start Integration Without APIs

**GO TO MARKET FASTER WITH
API-FREE INTEGRATIONS**

Start API-free to accelerate go-to-market, with an easy transition to APIs when available.

Highlights

Our API-Free Approach

Rapid Deployment:

Start integration immediately, without waiting for vendor APIs.

Powered by GUI Automation using Headless Browser X-path:

Automates data flow directly to HIS systems through secure, API-free GUI automation processes.

Flexible Transition:

Begin with API-free for a quick go-to-market, then migrate to APIs as they become available.

Traditional API Integration

Requires Vendor APIs:

Relies on vendors like HIS providers to offer APIs, often leading to delays.

High Speed & Smooth Transactions:

APIs enable faster data transfers, providing a seamless experience when available.

Implementation Timeline:

With vendor dependencies, deployment may take several months, slowing down time-to-market.

Our Implementations

Achala Health offers API-free automation solution for simple integrations like registrations, UHID creation, Check-in for appointments, Vital assessments, etc. via self-service kiosks. Our RPA-driven approach integrates directly with HIS systems, enabling rapid deployment and simplifying setup without complex vendor APIs. Gain a competitive edge by launching your integrations swiftly. Our solution is designed for smooth transitions to APIs, so you're future-ready.

Our Clients using automation:

Aster
PRIME HOSPITAL

CONTINENTAL
HOSPITALS
